BTS CABLE MANAGEMENT

Safe, Reliable Cable Ramps

Cables and Leads are often the most difficult items to manage safely and can be a particular hazard for schools, venues and theatres. BTS Cable Ramps eliminate trip hazards and prevent cable damage and the reliable interlocking system allows users to create any length desired.

- RUBBER AND FLEXIBLE POLYURETHANE CONSTRUCTION GRIPS FLOOR AND PREVENTS SKIDDING
- VERY LOW PROFILE PREVENTS TRIP RISK
- INDENTED TOP SURFACE PREVENTS SLIPPING
- CAN BE CUT TO CUSTOM LENGTHS AND ANGLES

Applications

- Perfect for covering large numbers of power, data cables and audio leads.
- Optional Black or HighVis finish makes this product perfect for performance venues.
- Can be used for temporary or permanent applications.
